Smarto releases ultimate virtual whiteboard,V-board

V-board will unleash the ultimate experience of virtual whiteboard

On 28th March,2022 Samrto is really excited to announce a new addition to the Smarto's product line-up. It's the V-board. V-board is the ultimate solution of a virtual whiteboard. It supports custom background and recording features to recap your important classes. So you will never miss any important meeting/class.

V-board solves the issues related to Pre-designed/Custom background color or the image. Sometimes the mentor needs to use a pre-designed color of image to save the time and have the experiences seamless. It helps the mentor not to memorize rather get into the core of the topic and graphically it's very satisfactory. Other than that there is a recording feature,which helps to save the class/meeting for recap.

In V-board users can have hundreds of Pre-designed background templates which cover almost all of the users' needs. You can also come up with your custom design and have a unique experience. Sometimes for some unwanted circumstances you may miss your class/meet. To resolve that problem V-board has an inbuilt recording system, which will help you not to miss any of your important classes/meetings.

"V-board is helping 2 million happy customers to have a unique and flawless experience" - Jimm Stoke,Senior Product Engineer at Smarto. He also added- "We are the first in the industry using AI and ML to improve the user experiences."

Anybody can start using V-board just to go into the V-board official website and install the software in only one click. Go and have an immersive experience.

"It's so easy to use and makes my hectic day smooth. Everyone should try it. I highly recommend it."- John Smith,Happy customer.

FAQs

1. How can I start using V-board?

Log on to Smarto.com and install with a single click.

2. Do I have to use the suggestions from V-board?

The suggestions from V-board are optional.According to the usage the inbuilt AI will suggest you interesting background/images. Other than that you can have your own custom background.

3. How does V-board learn from my usage?

V-board is built using AI and machine learning. So it learns from your usage and user behavior. Let's say, You like dark backgrounds and you use them frequently. Therefore

V-board will suggest a dark theme based background/image. By that way you will feel that the V-board knows your preferences.

6. Do you use my data to help with suggestions for other customers?

No,your data security is our top most priority. We don't share the content of yours with anyone else.

7. How long will it take V-board to learn my style?

It generally takes a couple of days of usage to understand your usability. After understanding your preferences V-board will suggest interesting background/images.

Internal FAQs

1. What will customers like most about V-board?

Customers will like the increase in efficiency and the customization it gives them, with that you can have a recording option which can be so much helpful for the customer.

2. What will customers like least about V-board?

Customers generally have customization and recording options.

4. How do we compare to our competitors?

Our biggest competitor is Google Whiteboard. But V-board offers customization and a better recording option for our user. Day by day we are improving the user experiences to be on the top of the segment.
